EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

- 1. Claims 1-22 are allowed over the prior art of record.
- 2. The following is an examiner's statement of reasons for allowance: The prior art Sasaki (United States Patent No.: 5,761,438), Degermark et al (Network Working Group, Request for Comments: 2507, February 1999) and Olsson et al (United States Patent No.: US 6,577,596 B1) fails to teach a method and an apparatus for transmitting packet data in a packet communication network, comprising the steps of: determining an operating state of the network and deciding a period for transmitting a full packet based on said operating state; and transmitting full packets having uncompressed headers at periodic transmission times according to the decided full-packet transmission period, and transmitting compressed packets having compressed headers during other transmission times; wherein if the operating state of the network is determined to be congested, the period for transmitting a full packet is set to be small, such that uncompressed headers are transmitted more often when the network is more congested, as substantially described and connected in independent claims 1 and 13. These limitations, in combination with the remaining limitations of claims 2-12 and 14-22 are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
